

## Increase productivity and enable secure remote work

Business Standard | Business Premium | Enterprise

By AppRiver, the #1 Provider of Microsoft 365 in North America

Deploy (or upgrade) the nucleus of the modern workplace—Microsoft’s iconic suite of work, collaboration, and productivity tools. It includes everything from Word and Excel to Teams, Stream, and SharePoint.

Don’t get your Microsoft 365 from just anybody. AppRiver has a unique, 20-year relationship with Microsoft and was the first North American reseller for its Microsoft 365 (formerly Office 365) offering. With over 10,000+ successful migrations, our experts can help you select and implement exactly the right package and guide your digital transformation. Plus, our team can act as your proxy to escalate issues.

### FEATURES:

- Web and mobile versions of Microsoft 365 apps
- Desktop version of Microsoft 365 for PC and Mac
- Exchange email and calendaring
- File storage and sharing
- Teamwork and communication
- Security and compliance
- Windows licenses
- Device and app management
- Task management
- Phenomenal Care Support

*By 2023, 50% of organizations with a direct relationship with Microsoft will switch to using an indirect partner out of convenience.*

### BENEFITS:

- ✓ Financially-backed 99.9% uptime, geo-redundancy, disaster recovery, and powerful security
- ✓ Premium productivity tools with Microsoft 365
- ✓ Standardized tools to reduce multiple login requirements and learning curve for training
- ✓ Enhanced security framework to protect data across logins and remove the hassle and liabilities associated with employee devices
- ✓ All platform components work seamlessly together and receive structured updates that are compatible with the entire stack.
- ✓ Simple to manage and support with Secure Cloud

 Office 365

### PRO TIP: DON'T FORGET TO SECURE YOUR ENVIRONMENT

Every year, thousands of businesses fall prey to thinking their email provider’s native security features are “good enough.” AppRiver’s 20-year relationship with Microsoft has allowed it to develop security solutions that complement and extend your coverage to stay ahead of threats.

- Microsoft 365 Security Audit
- Email Threat Protection
- Email Encryption

## WHY NOW?

If your business tools aren't designed to work together, they typically don't. This often introduces friction into everyday work and limits the entire organization's productivity. (Consider the time wasted trying to send oversized files, multiplied across the entire organization, for years.) Businesses that are intentional and deploy a suite of interlocking productivity and security tools reduce their IT burden while increasing worker productivity.

## WHY MICROSOFT 365?

Microsoft 365 brings together Office applications, management tools (for mobile devices, apps, security, identity management and much more), operating system upgrades, and other efficiencies that truly prepare businesses for the future. By removing the complexities of software incompatibility and obsolescence, Microsoft 365 serves as an essential foundation for the secure, modern workplace.

Plus, as an integral part of Secure Cloud, Microsoft 365 works seamlessly with AppRiver's other security, compliance, and productivity services in our Secure Suite.
